Portable Metal Detector Foldable Handheld Metal Detector Beeping Vibration Warning High Sensitivity Scanning Instrument Description: 1.Fast detection and sensing, long-lasting range 2.Outdoor detection selected 3. Convenient folding, portable 4.LED screen three modes: silent mute vibration detection mode, beep without vibration detection mode, beep vibration detection mode 5. Wide range of applications: the product is widely used in government agencies, airports / stations / examination halls and other security needs of the premises Specification: Model: DM3005A/DM3005B Display color: Green/blue Current consumption: less than 3mA Operating Temperature: -10℃~+50 Detection mode: silent mute vibration detection mode, beep no vibration detection mode, beep vibration detection mode Probe: 140mm Battery: 9V 6F22 battery*1(Without Battery) Package Includes: Metal detector *1 Instruction manual *1 Lanyard*1

COMPONENTS
Battery Cover
Auduble and Vibrating Alarms
Display
Power Switch
360° Side-scan Detection Area

Battery installation

Easy to operate , better experience

Open the rear cover put the 6F22 9V battery into the detector

Close the battery cover

Details determine quality

Advantages that give you peace of mind

Buzzer alarm/vibration

When the detector detects metal .
The buzzer sounds an alarm and vibrates

Easy to use

Just this one step is all that is needed to test at start-up, Easy to use

Fast detection response
Built in induction coil . if metal substance is detectedin the detection range , it will alarm immediately

Applicable environment

Quickly realizes the detection of
very small metal objects

KODAK

268mm/10.55in
147mm/5.78in

Without battery
