Features
1. Compatible with various solar panels and battery systems for broad applicability
2. Features automatic lighting at dusk and automatic shutdown/charging during daylight for fully automated operation
3. Suitable for diverse DIY scenarios including courtyards, street lighting, and more
4. Integrated LED driver circuit allows direct connection to LED fixtures, simplifying installation
5. Constructed with premium materials and protective design for outdoor durability
Parameter
Voltage: DC 3-45V
Maximum Charging Current: 10A
Maximum Output Current: 20A
Automatically illuminates at dusk and powers down at dawn for charging
Note: Ensure adequate heat dissipation during high-current operation
Package include
Module*1
