Ride With Us

Company Profile

As an e-bike manufacturer, our primary objective is to provide users with the best traveling option and exceed their expectations regarding product quality. There is a wide selection of options available with many different designs; these include the T, F and S series. Each e-bike is a body made of aluminum alloy with a safety frame that can withstand a significant amount of impact

Battery	60V/30Ah
Display	LCD display
Range	90km/65mils
Charging Time	About 6.5-10h
Top Speed	75kph/ 46.6mph
Braking	Hydraulic brakes
Size	L1900*W702*H1093mm
Tire	70/100-19M/C front & 80/100-19M/C
Motor	6000W(Peak power)/3000W(Rated power)

A person wearing a black and yellow motorcycle suit and a helmet with goggles is riding a dirt bike on a rugged, rocky trail. The rider is leaning forward, and the bike is kicking up dust. The background is a dark, textured landscape of rocks and dirt.

The wind, carrying the earthy scent of soil blows
straight at your face—this is what true
freedom smells like

I START SETUP

What you triumph over isn't the rugged mountain
roads, but the old you who held back
and hesitated to move forward.

No smooth road only unyielding
wheels; No turning back only
a forward journey

Racing-Grade Off-Road Suspension

190mm Tourxon inverted hydraulic
front fork FASTACE 350LBS adjustable rear shock | 50mm
travel Tames bumps, jumps & gravel with ease Pro-level stability & control

Highlight LED headlights

The headlights illuminate a farther and wider range helping users spot potential hazards like gravel and potholes in advance and greatly reducing the risks of night riding

Hydraulic brakes

High-performance hydraulic brake system delivers rapid response and uniform, stable braking force, enabling precise speed control and instant stable stops even in complex off-road conditions

Effortless Power Wild Freedom

High-torque motor delivers smooth, responsive power conquering gravel and trails with ease, letting you ride further explore more, without strain
