

PRODUCT MANUAL

1. Product Information

Product Name: Shower head

Batch/Serial Number: [10002879]

2. Safety & Warnings

Important Safety Information

Read all instructions before use. Failure to follow these instructions may result in damage to the product or personal injury.

- Do not use this product for purposes other than its intended use.
- Inspect the product before each use; do not use if damaged.
- Follow installation and operation guidelines to avoid injury.

3. Instructions for Use **Mandatory**

a: Before installing and using the shower head, check the integrity of the product and its accessories (hose, bracket, filter elements). If any cracks, leaks, or damaged parts are found, replace the damaged components before use.

b: When installing the shower head, align the threaded connector with the water pipe and tighten it by hand, then use a wrench to secure it gently. Do not use excessive force to twist the shower head body, as this may cause the internal seal to deform and lead to water leakage.

c: If the shower head has a built-in filter element, it should be cleaned or replaced regularly according to water quality conditions. Blocked filter elements can reduce water flow and affect the shower experience.

d: The shower head is designed with multiple water outlet modes (e.g., rainfall, jet, mist, massage). Press the mode switch button to adjust the water flow as needed. Avoid switching modes frequently under high water pressure to prevent damage to the internal valve core.

e: After use, wipe the shower head and hose with a soft cloth to remove water stains and scale. Do not use abrasive cleaners or hard brushes, as they may scratch the surface coating and affect the appearance and service life.

f: Keep the shower head and its accessories away from sharp objects and heavy pressure. Do not use the shower head to scratch or pry objects, and avoid placing heavy items on the hose to prevent deformation or rupture.
