Attention |

This manual uses illustrations to illustrate the procedure and precautions. The pictures in this manual are for reference only. Please refer to actual objects. The company will continue to upgrade and update the product features, if the actual operation and the manual differences, without notice! Please refer to the actual operation function of the machine, please understand!

I. WARNING

In order to ensure the personal safety of you, your car and others, please be sure to meet the following basic requirements:

- 1、 Please read all relevant instructions carefully before using this device. Any damage to the unit caused by failure to follow the instructions will void the warranty.
- 2、 In order to ensure driving safety and avoid violating traffic rules, please do not watch programs and operate the machine while driving.
- 3、 To avoid short circuit, do not expose this unit to rain.

- 4、 In order to prevent short circuit, please do not place or leave any metal objects (such as coins or metal tools) inside the device.
- 5、 Please use the machine according to this manual, do not open the machine for maintenance by yourself, if maintenance is required, please go to a professional maintenance station for maintenance.
- 6、 When the engine is off, do not use the car audio for a long time, otherwise it will drain the electricity in the battery.
- 7、 Do not insert objects into ventilation slots or other openings of the device
- 8、 Do not touch, rub or knock the screen with sharp objects.

II. CLEAN EQUIPMENT

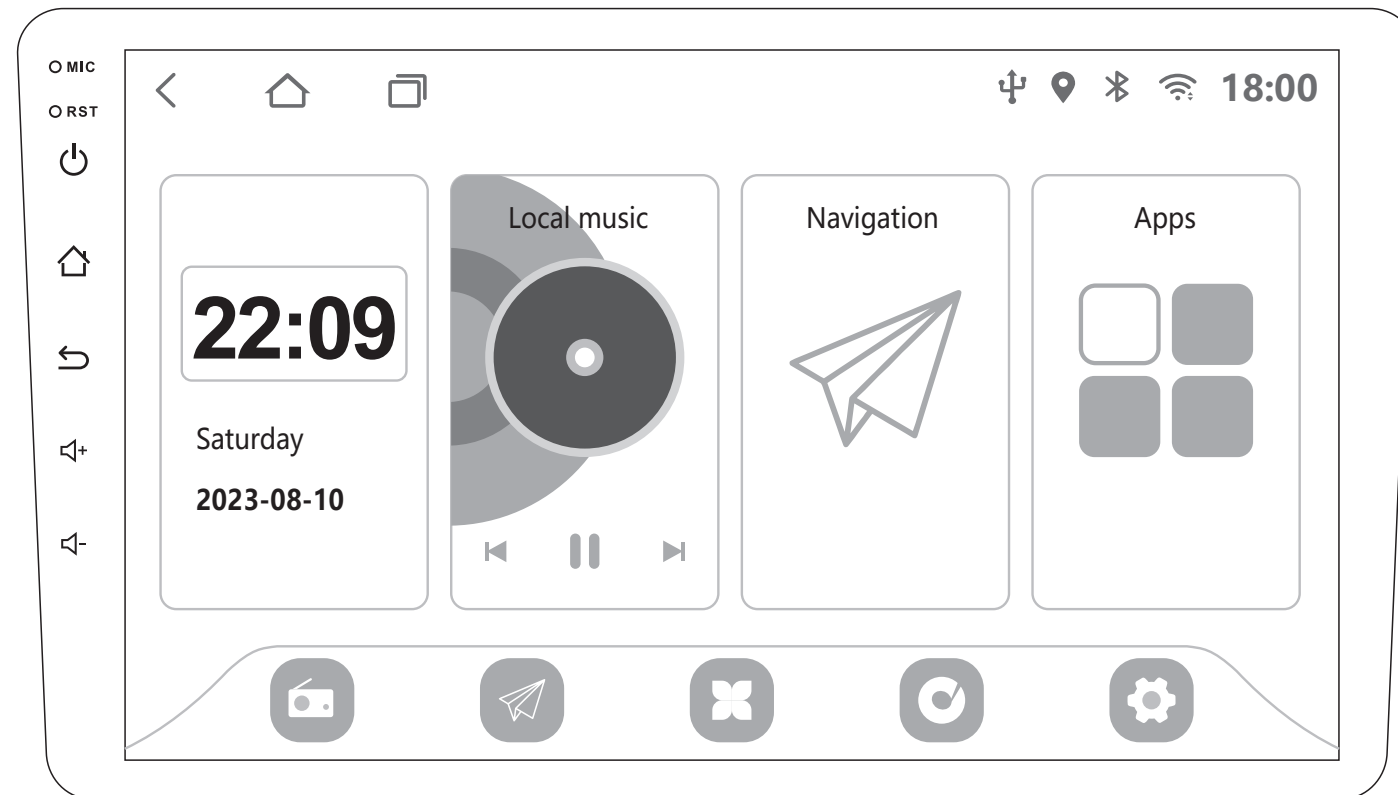

- . If the panel of the device is stained, you can use a clean soft cloth to wipe off the stains, such as a cleaning cloth.
- . If the panel is very dirty, please wipe off the dirt with a neutral detergent, and then wipe off the detergent with a clean soft cloth.
- . **CAUTION** Using cleaning sprays directly on the device may affect the mechanical parts of the device. Use a hard cloth or volatile liquid (such as thinner or alcohol, etc,) to wipe the panel, which may scratch the surface or erase characters.

Picture -15

II、 Guide before you go:

- 1、 Make sure the host is correctly connected to the satellite dish. The satellite dish needs to receive satellite signals during the startup period And update the internal information. After a few moments, it can work normally. At this time, the status bar of the screen shows that the satellite has been located Zhi.
- 2、 Make sure the vehicle is not located in a place with poor satellite reception, such as a tunnel, under a bridge or near a tall building And so on.
- 3、 The driver should first set the navigation destination in the parking state, and do not operate the navigation during driving.

III、 Navigation function

- 1 . You can find the destination you need to reach according to various retrieval functions of the navigation software. After setting it as the destination, Start to plan the path and navigate.
- 2、 in areas the driver is more familiar with, choosing to drive on your own may be more suitable for driving conditions than routes mapped out by navigation software-Condition.

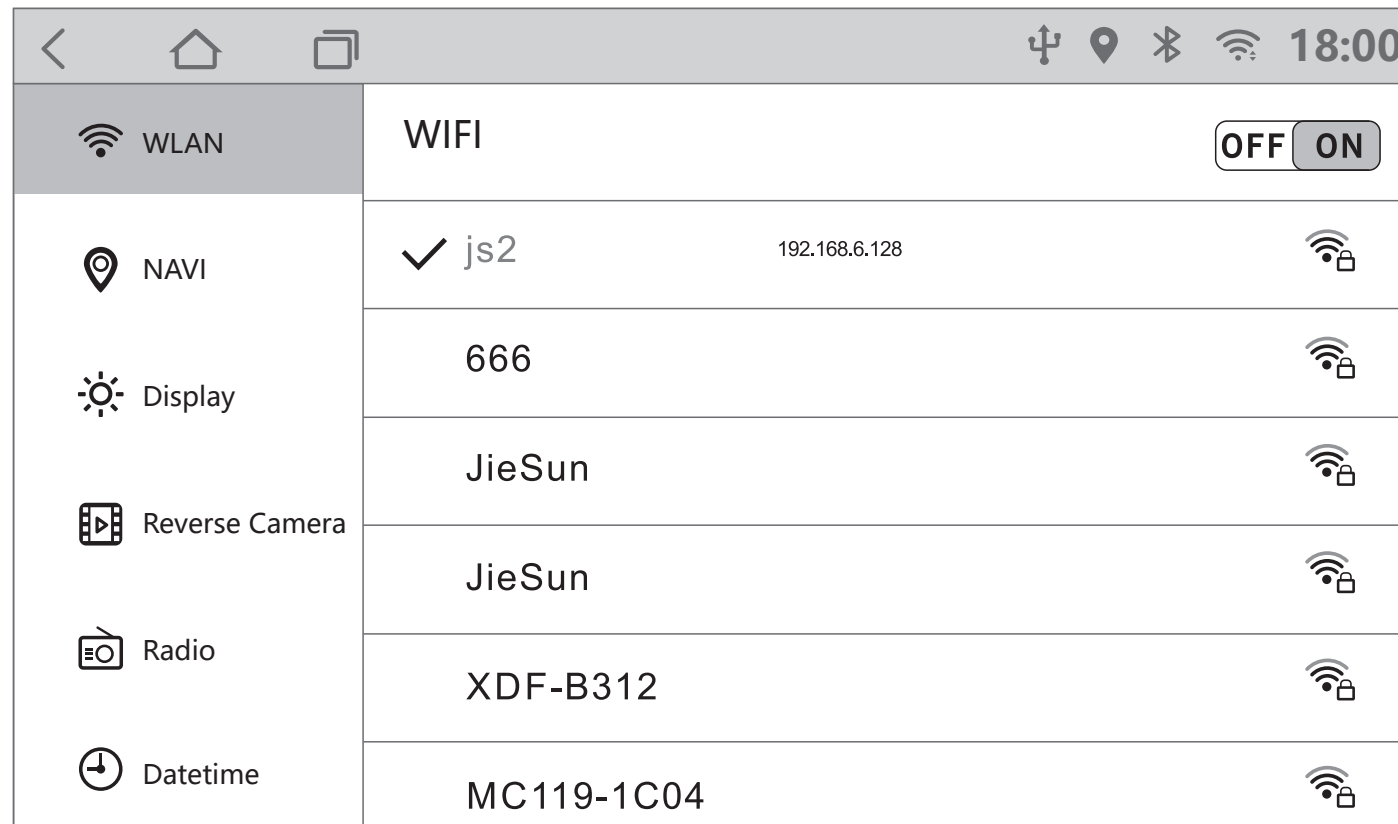

IV、 Navigation map description

Because of the rapid development of urban construction and road traffic, navigation-map companies will continue to update the navigation map, please timely Unpack-the update information of the navigation map and update it.
