⚠ Verify device compatibility before use.

⚠ Power off before installation to ensure environment safety.

Working principle :

1x2 /1x4 HDMI Splitter It is a flexible hub for a variety of displays. If you connect two or more HDMI splitters, you can form a larger splitter.

HDMI Splitter Connect an HDMI source to the splitter's input with an HDMI cable. There are 2/4 HDMI outputs. Output 1 is the main output used to connect the main display. Output 2 follows the main display.

HDMI products support audio and video signals.

Fully compatible with HDCP1.2.

Remark:

There are 2 options here "1 in 2 out" "1 in 4 out", please buy according to your needs.

All outputs display the same screen at the same time, without extended display function.

Performance :

1. Simultaneously connect 2/4 HDMI monitors to 1 video signal can be displayed simultaneously.
2. Support 720i, 720p, 1080i, 1080p, 2160p resolution
3. Support HD resolution video - up to 2160p high-quality HDTV resolution can be easily obtained

4. Fully support HDMI1.4
5. Quick installation, easy to operate
