12-Inch lamp: Double Lamp Socket

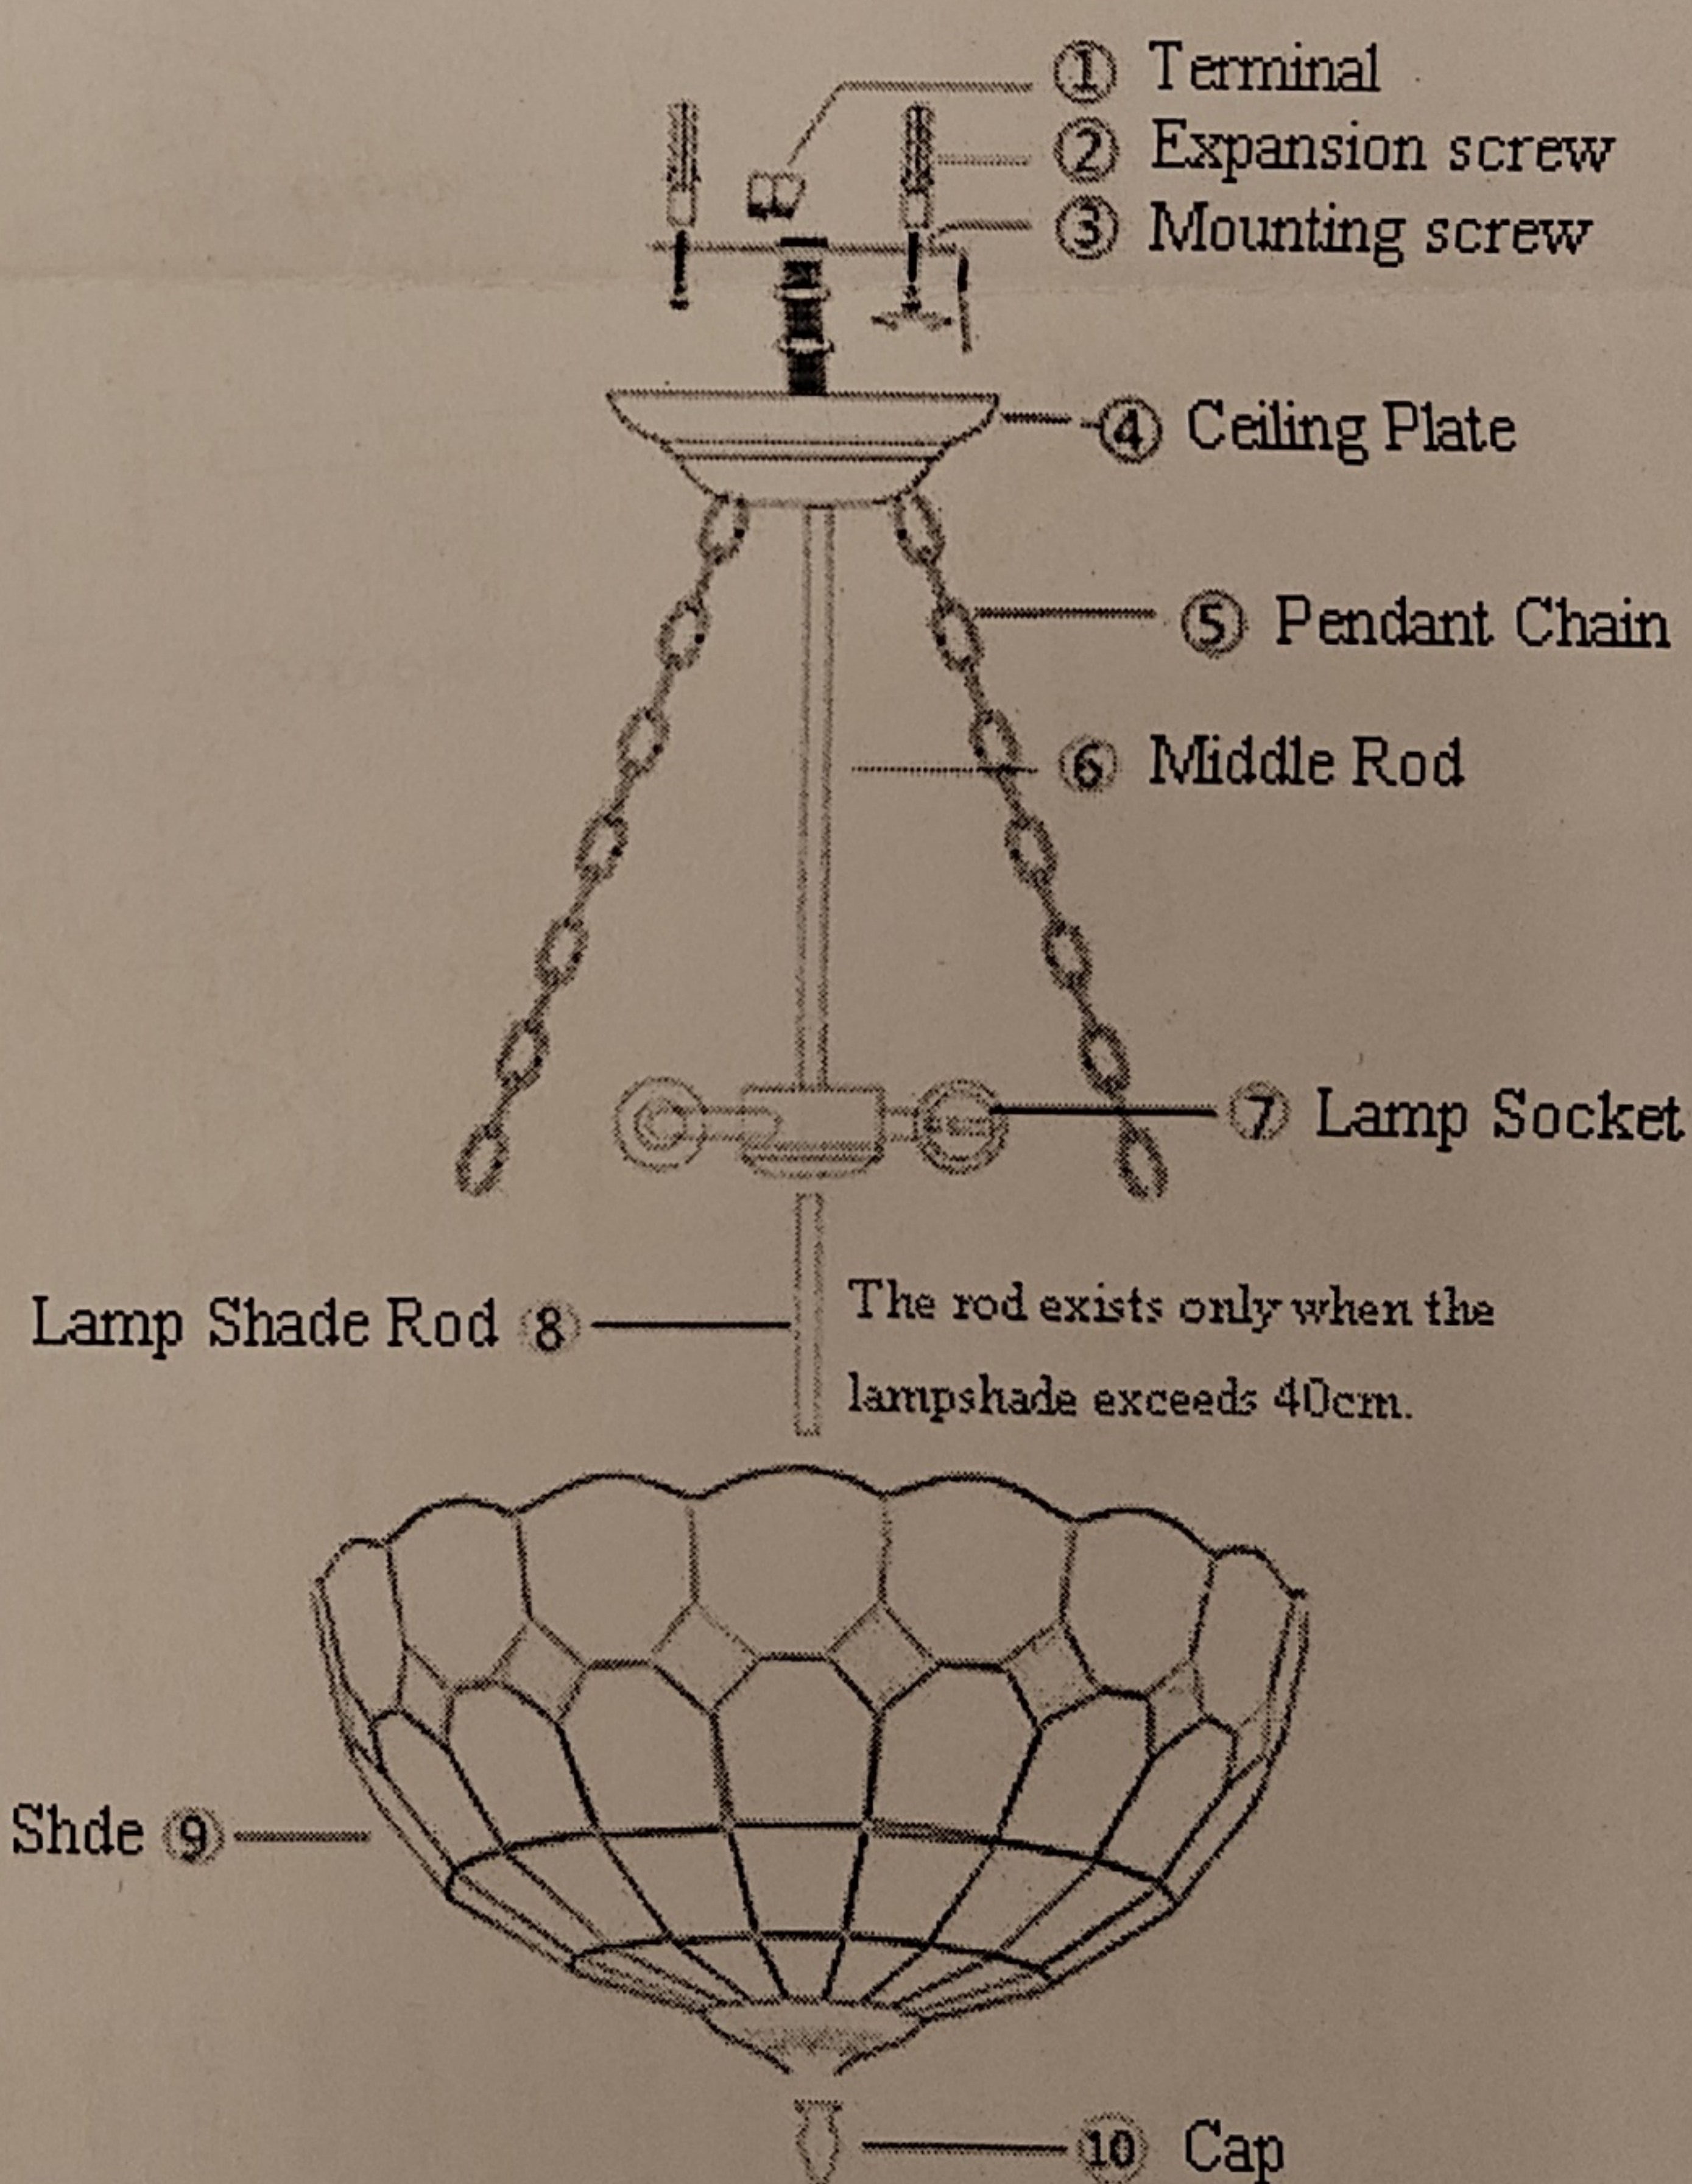

16-Inch Lamp: Triple Lamp Socket

Thank you for purchasing our products

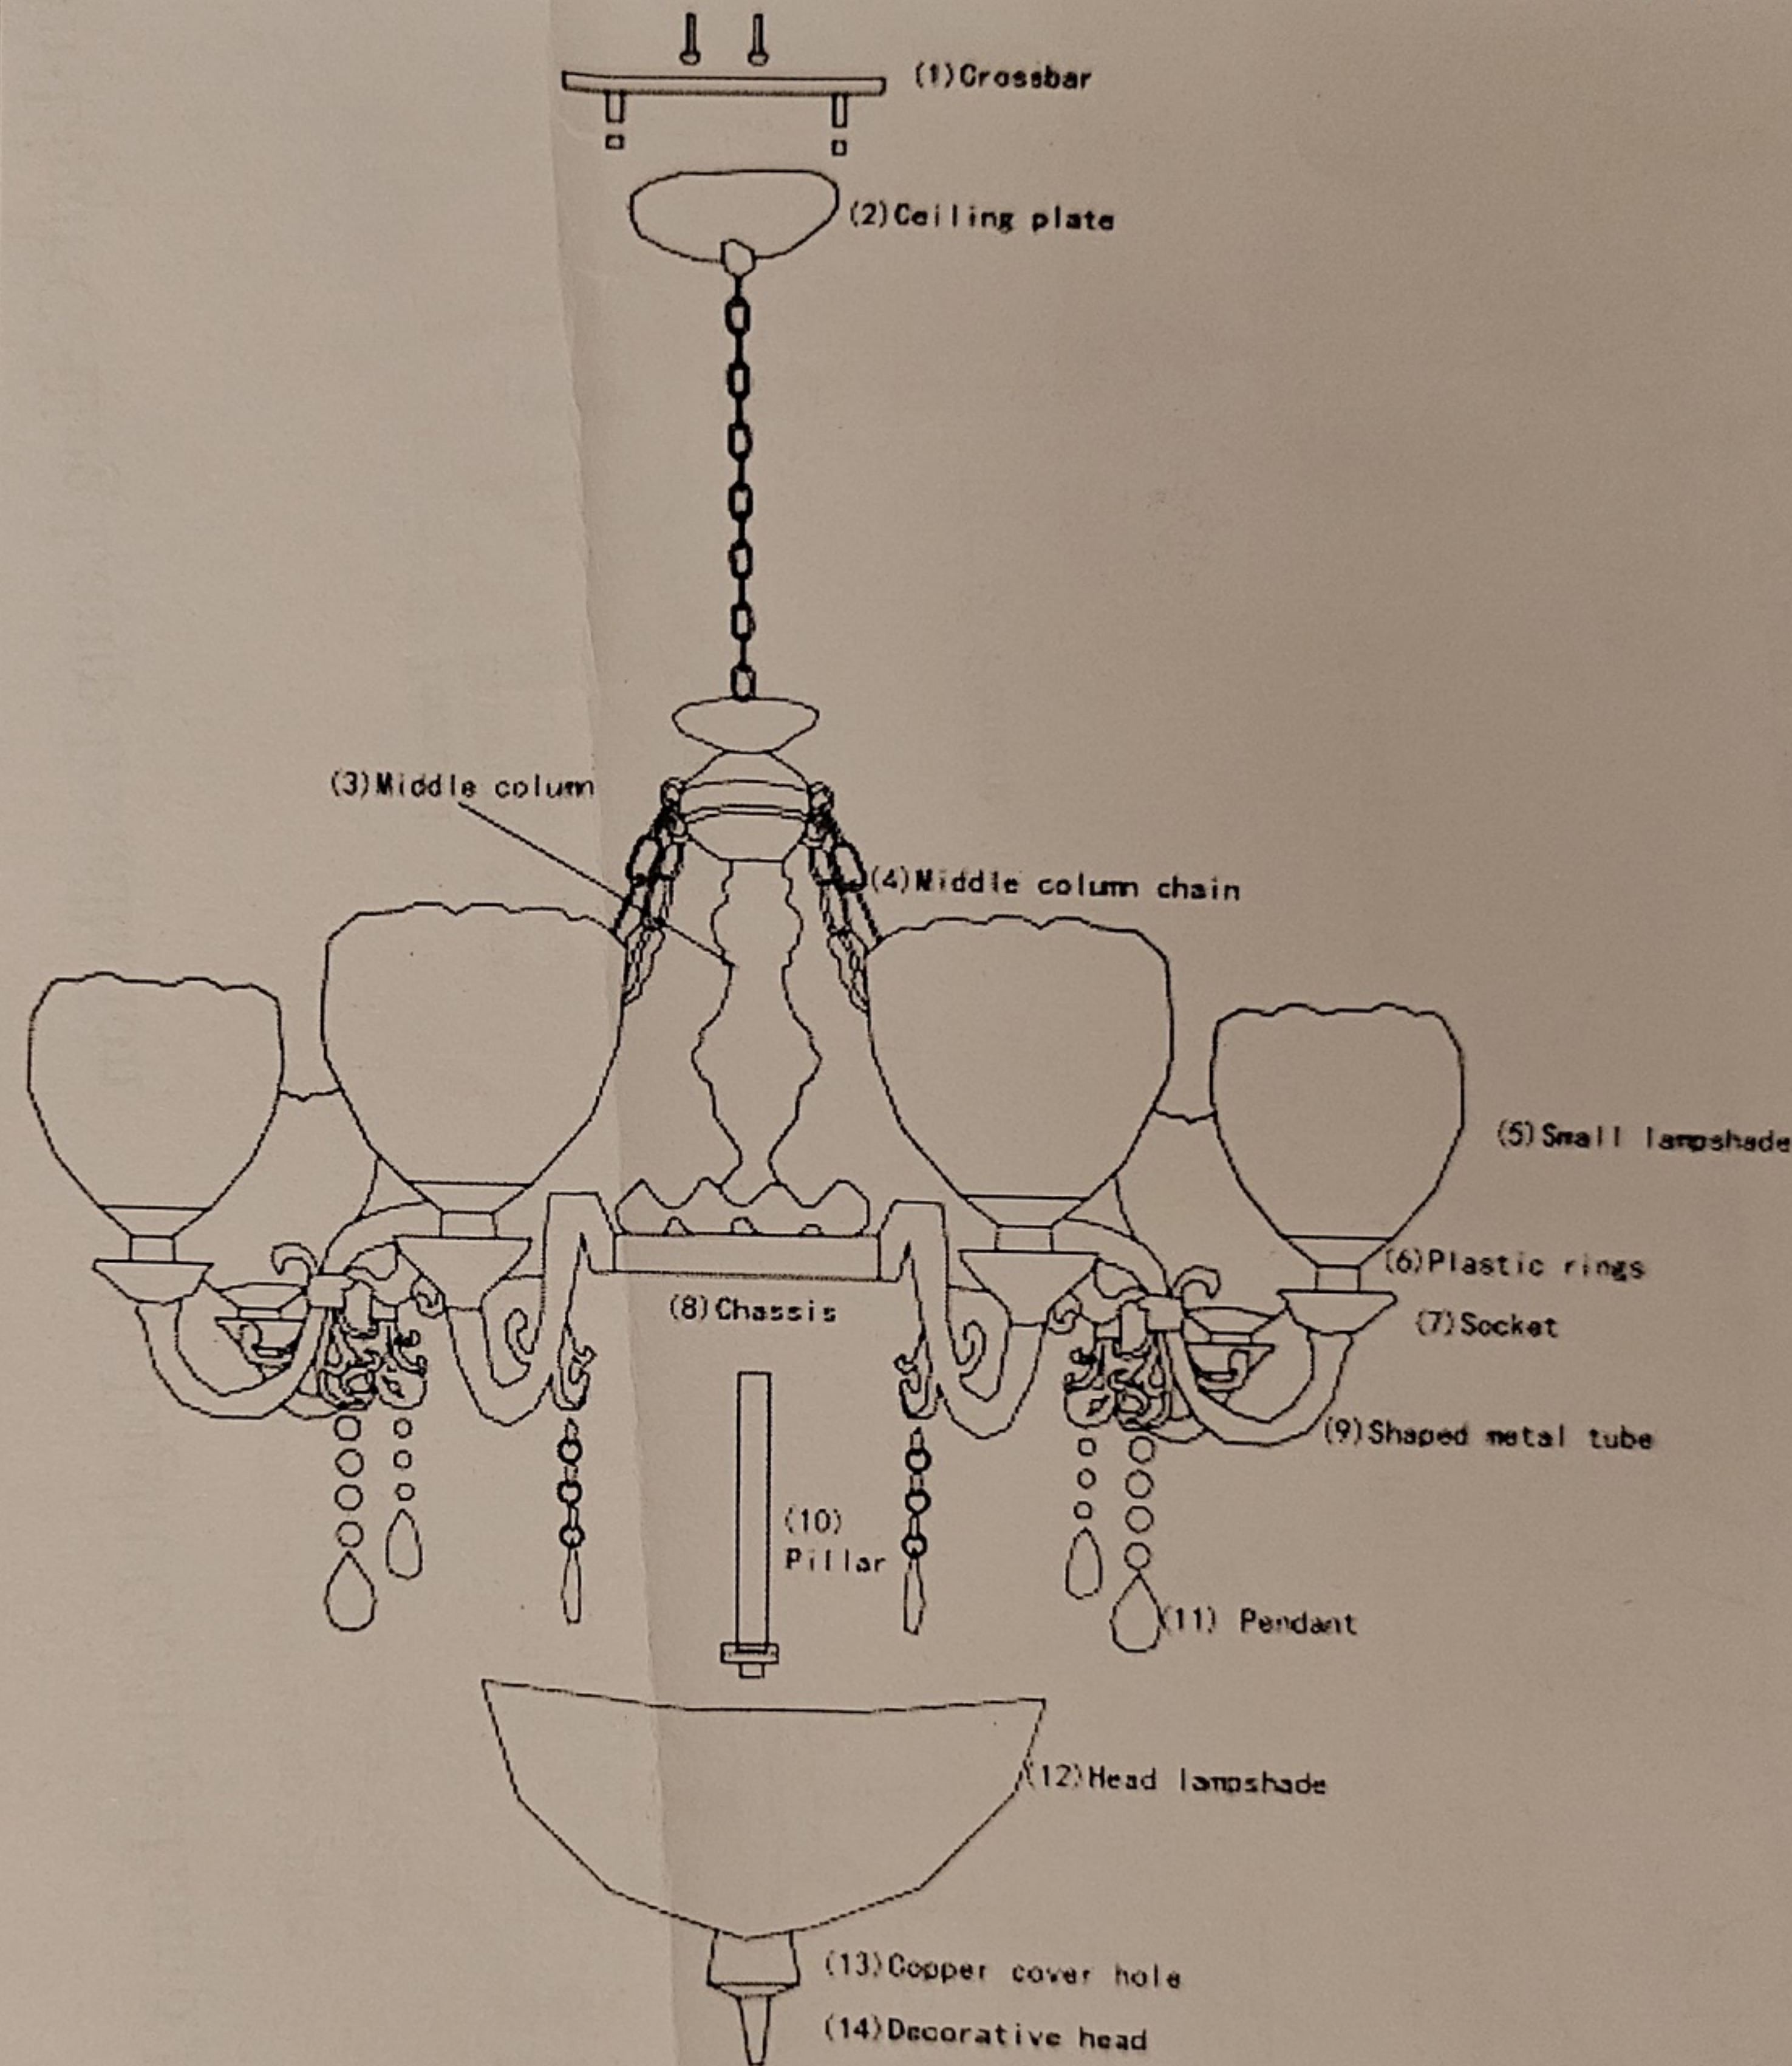

**Please read the installation instructions carefully before
About the lampshade**

1. The lampshade is handmade. Unlike mechanical production, the welding wire cannot be very uniform (there will be intermittent or uneven height).
2. When you receive the lamp, you may feel that the glass cover is oily. This is a necessary process for our type of lamp before shipping (to prevent the black welding path from being oxidized and turned gray). Please don't use detergent or laundry detergent to clean it, take it out and let it evaporate naturally for two days or wipe it gently with a soft cloth, Later maintenance can be wiped with water wax or vegetable oil.
3. Many friends feel that the lamps are not like glass (especially those with larger glass sheets, the glass is big, and the sound when knocked on is rather dull. They don't have the same crispness as window glass, so they think it might be resin, plastic, acrylic, etc.).

INSTALLATION INSTRUCTIONS

Chandelier Installation Instructions

Step 1: Connect the shaped metal tube (9) and the chassis(8) holes together and tighten the knob;

Step 2: Connect the wire of the small lamp to the main line (connect the red line to the red line and the blue line to the blue line, and then connect each line to the main line);

Step 3: Assemble the middle column(3);

Step 4: Connect the middle column chain (4) to the chassis(8);

Step 5: Make a hole in the ceiling and fix the position with a crossbar;

Step 6: Install the entire lamp and lock it with screws;

Step 7: Put the small lampshade (5) directly on, then twist the plastic ring (6) to fix it;

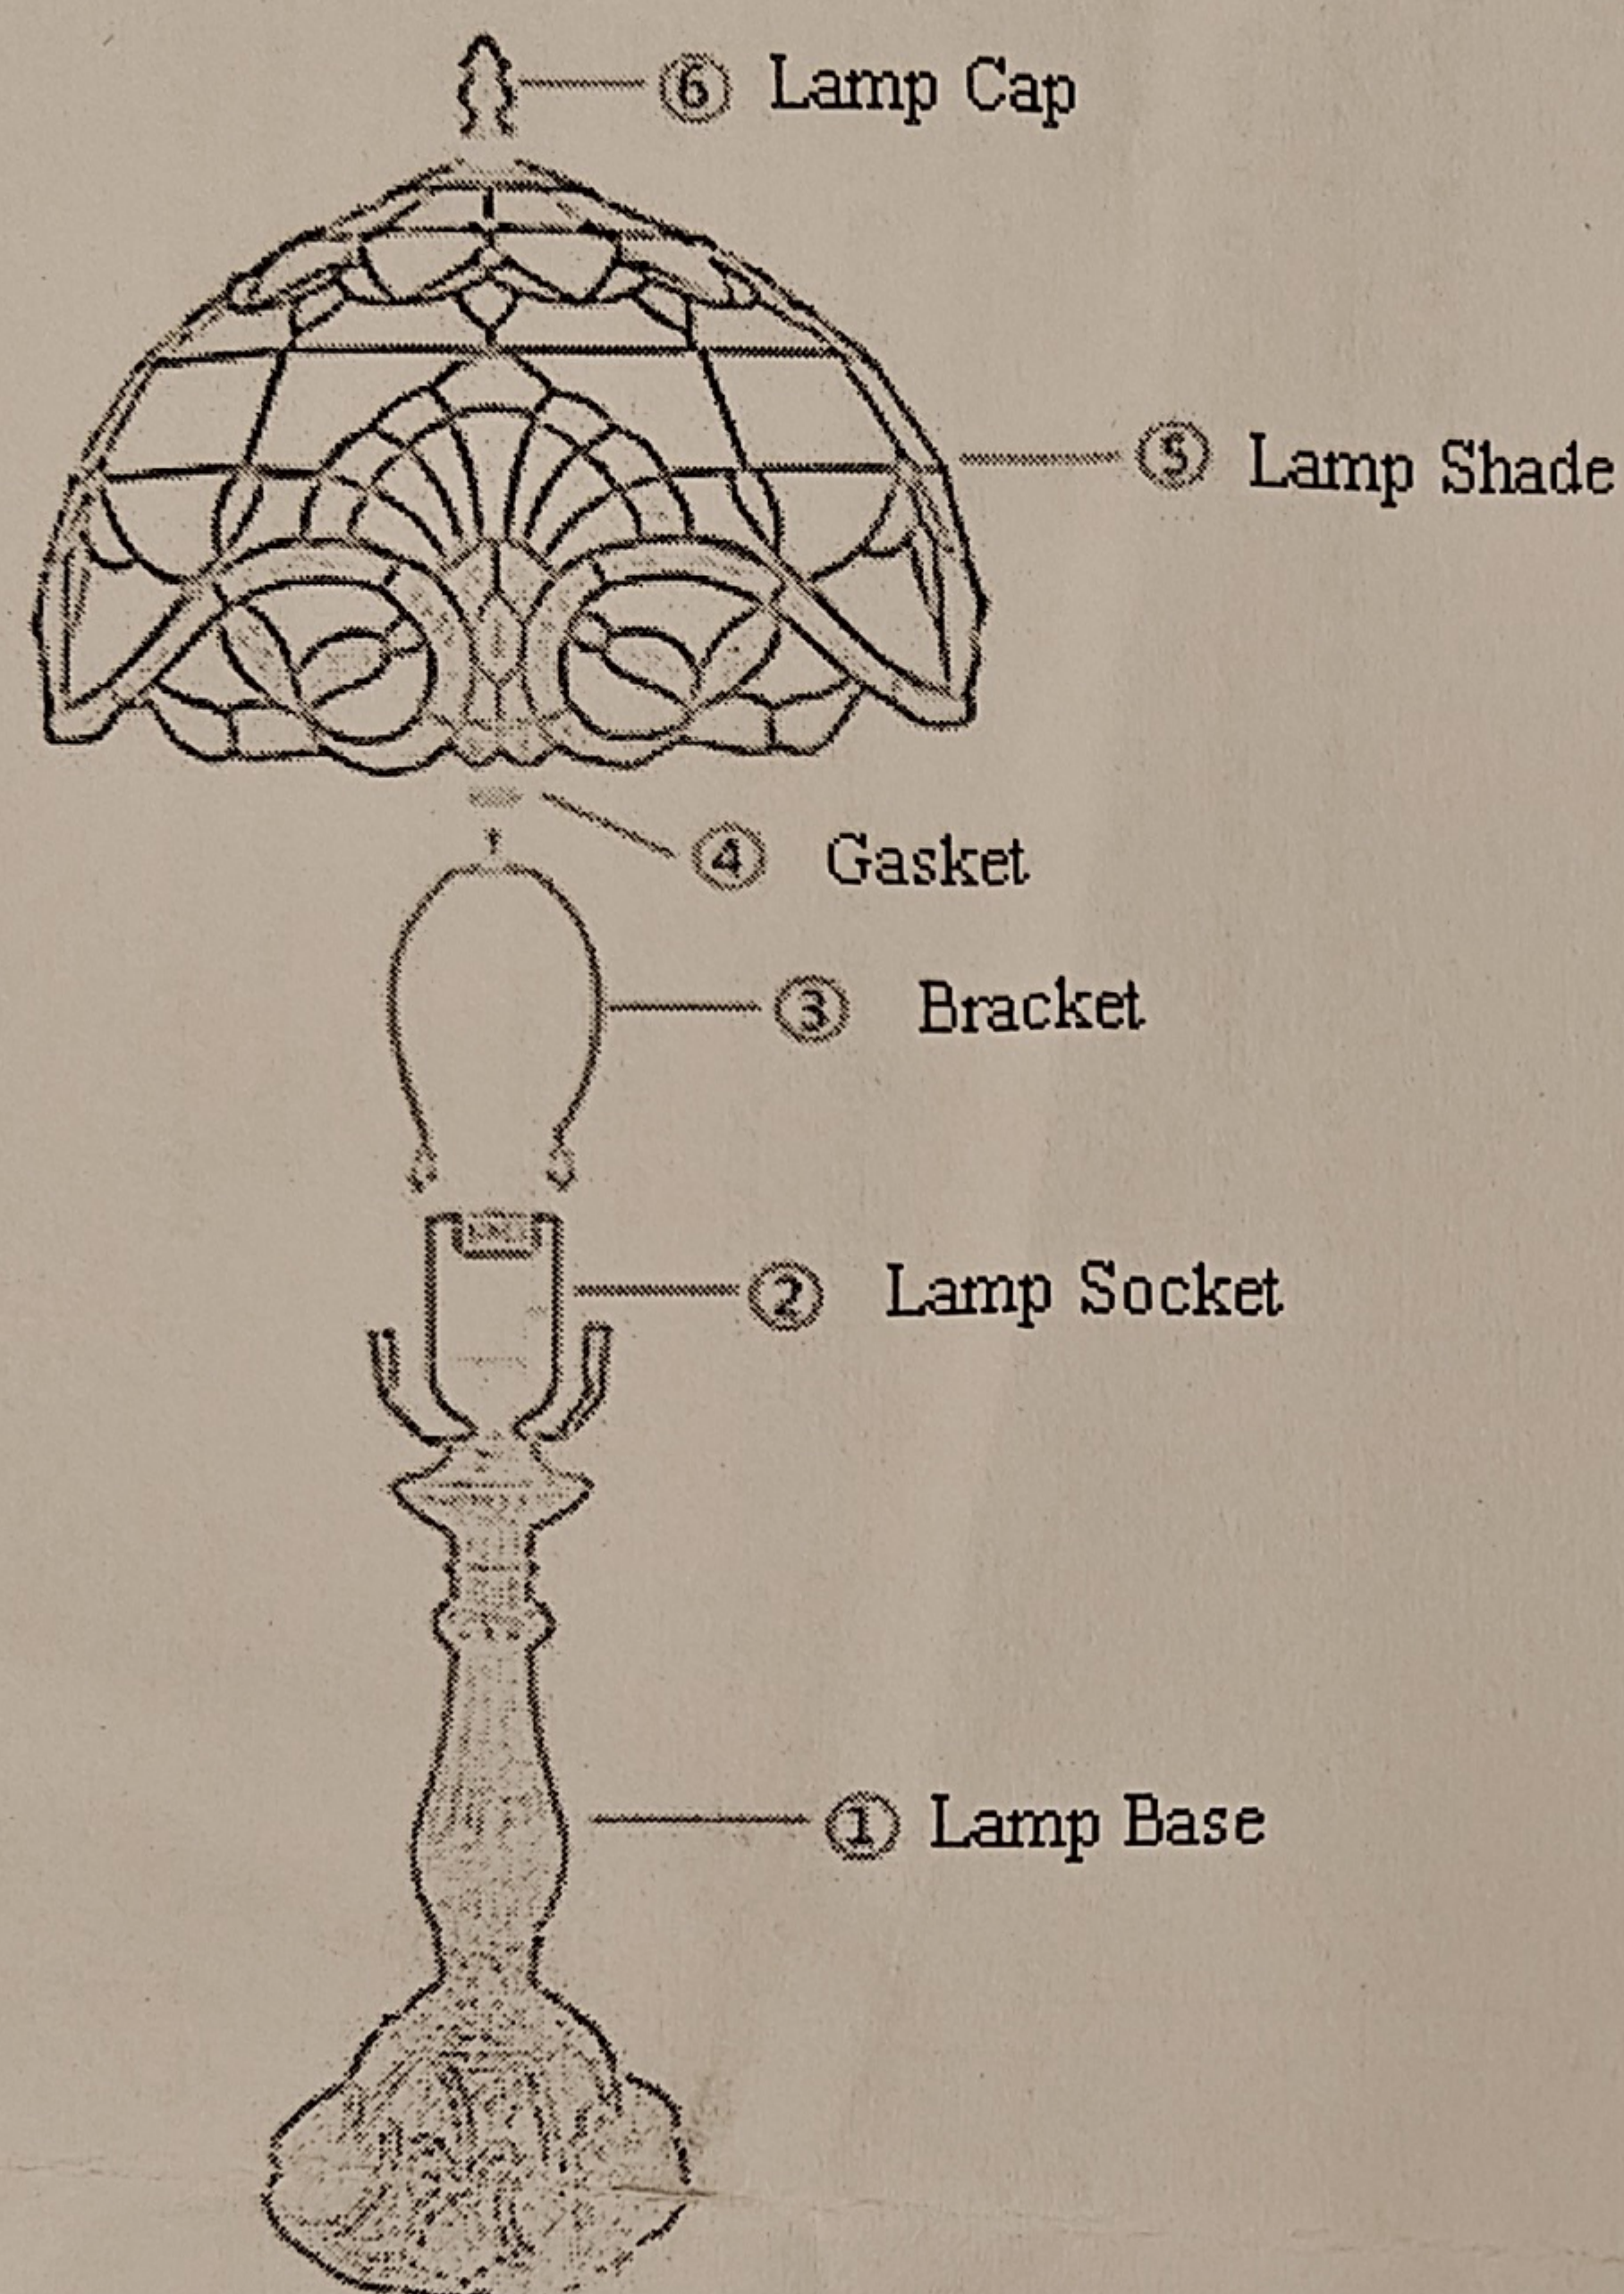

Step 8: Twist the pillar(10) in the middle of the chassis (8) to fix the hole;

Step 9: After installing the bulb, install the head lampshade(12) and secure it with the decorative head (13) ;

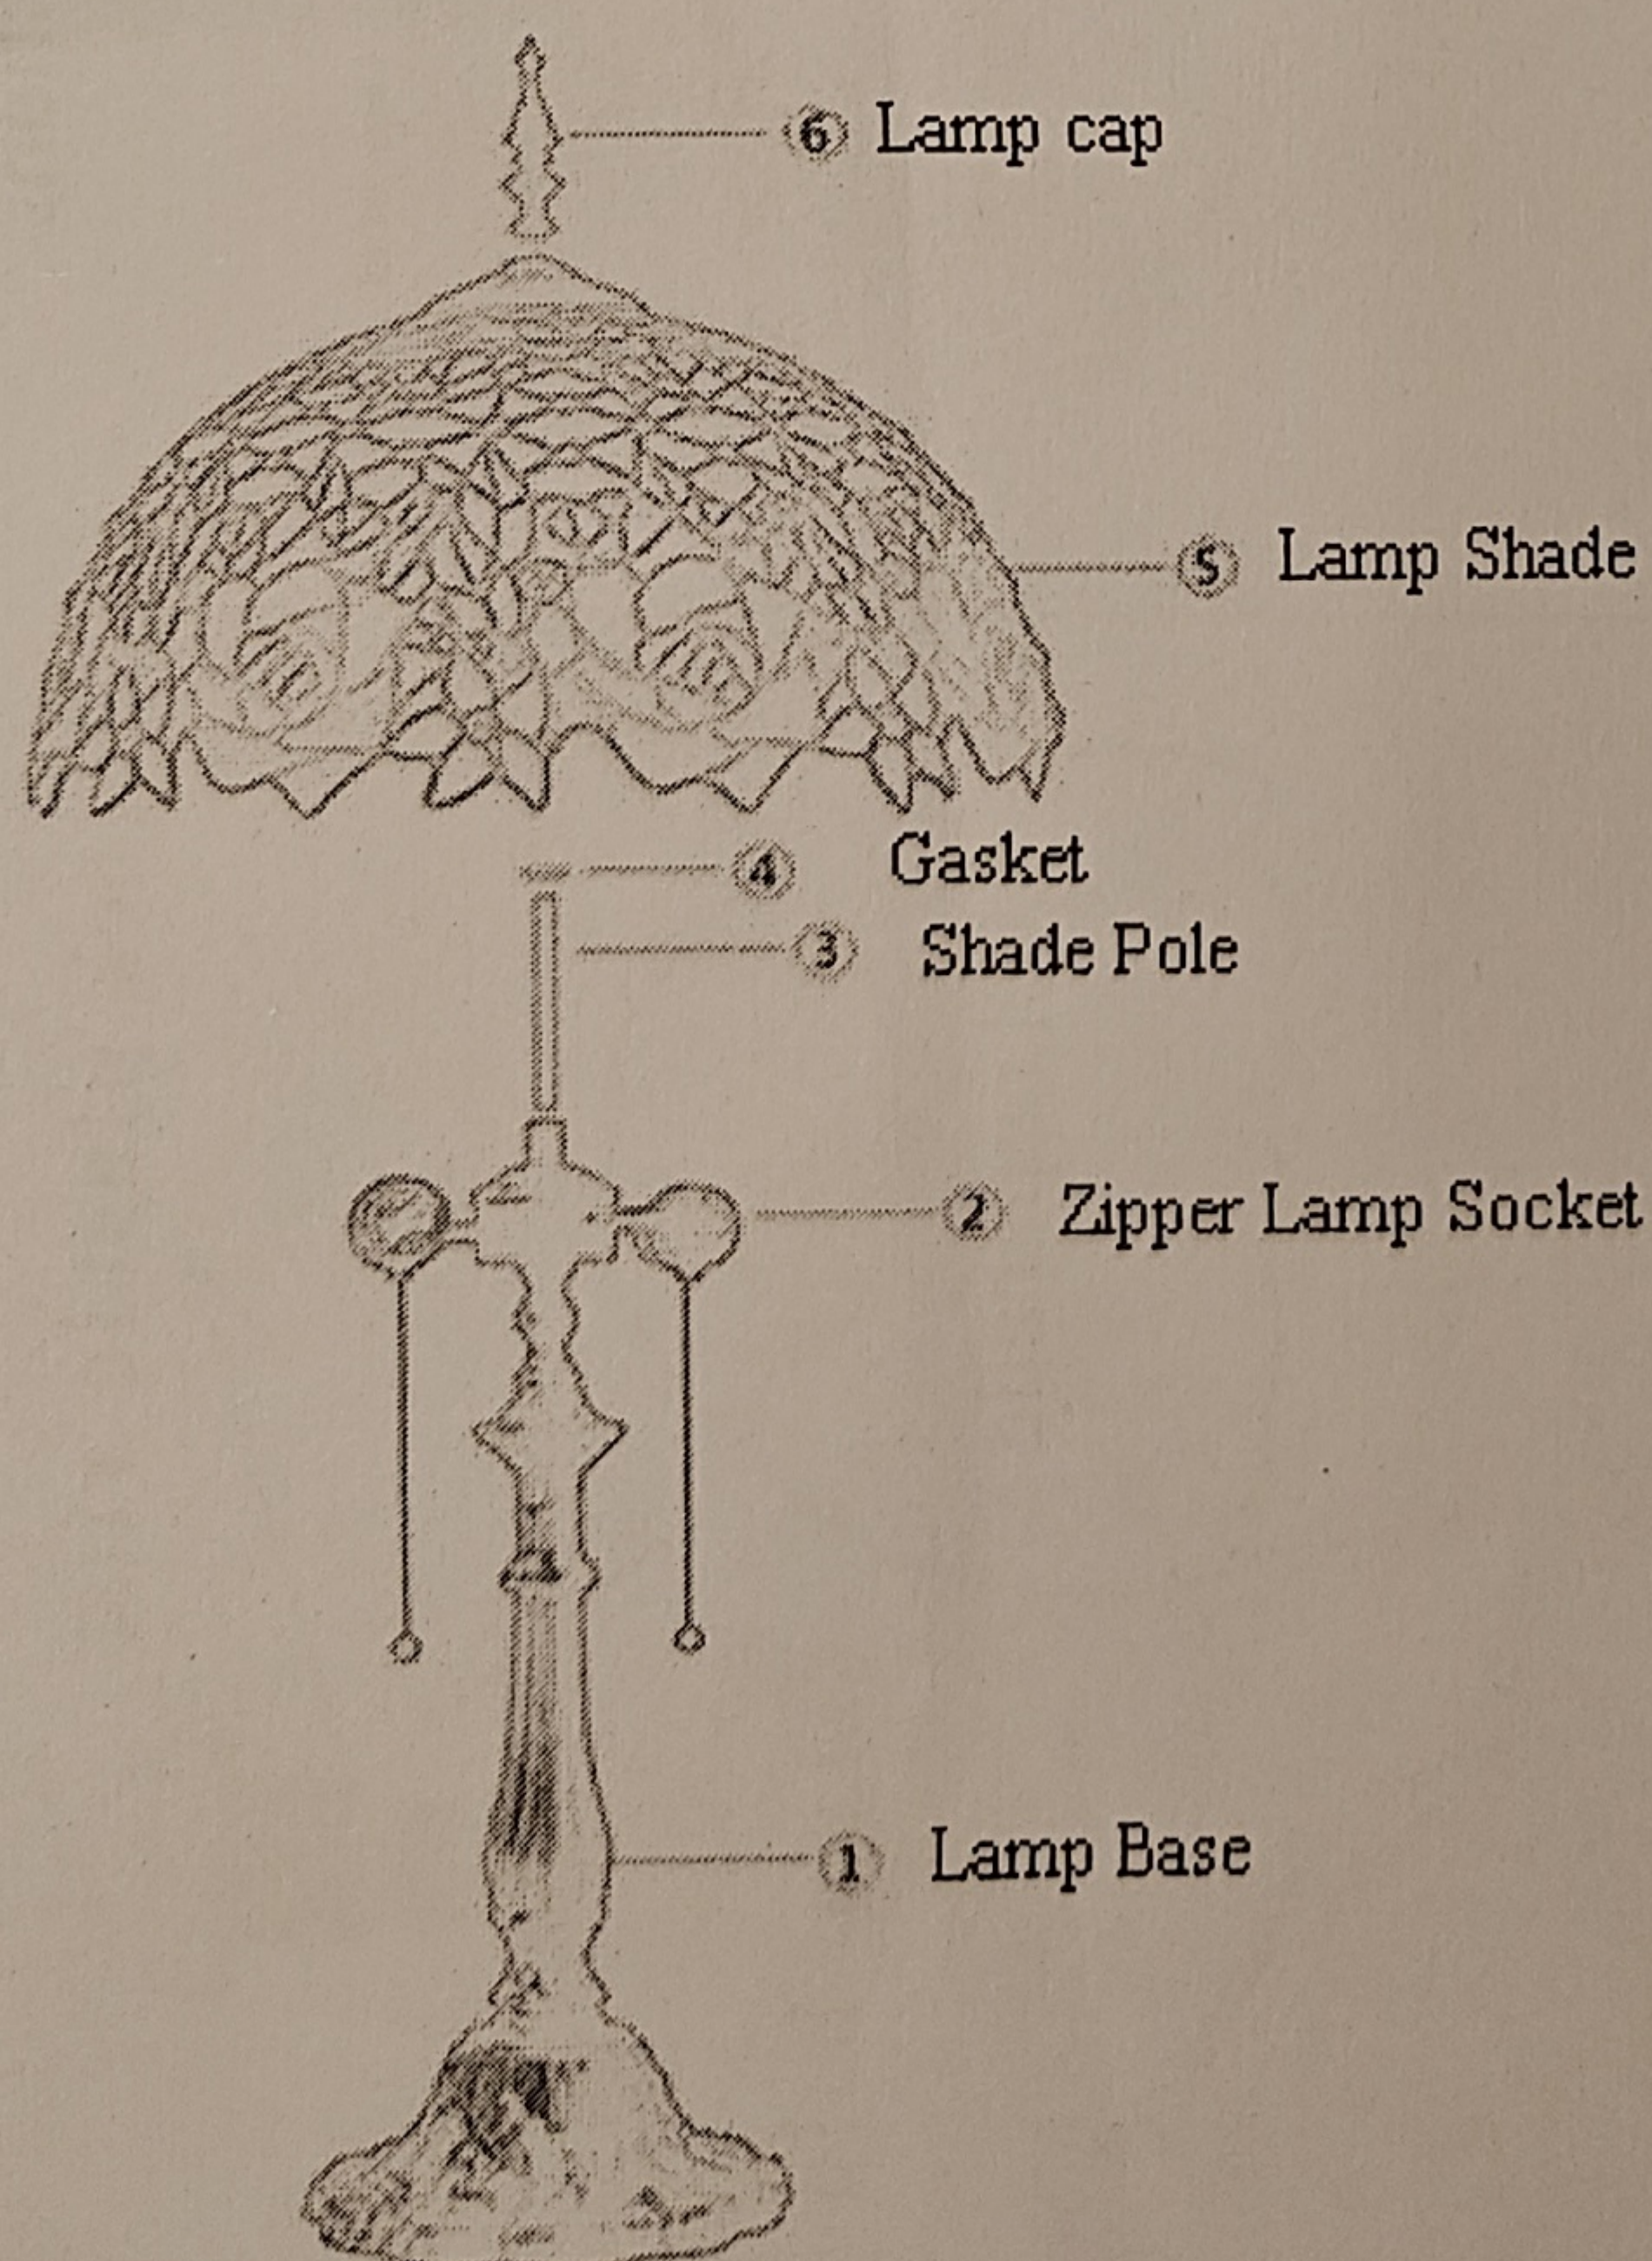

Step 10: Attach the decorative head (14);

Step 11: Install the lamp bulb in the small lampshade and simply hang the pendant (11).
