

Use Manual

How to use?

1. TX mode

- a. Connect the device with TV, PC or notebook via 3.5mm aux cable or any other compatible cable.
- b. Turn on the device and switch to TX mode, the light will be flashing.
- c. Turn on Bluetooth earphones/speakers, let them close, they will pair with each other automatically

2. RX mode

- a. Connect the device with wired speaker, headphone, amplifier via 3.5mm aux cable or any other compatible jack or cable.
- b. Turn on the device and switch to RX mode, the light will be flashing..
- c. Turn on the Bluetooth of mobile phone, tablets, etc, find the device name on the Bluetooth page and connect.

Attention

1. When in TX mode, please turn off other Bluetooth device in your home, only leave the one you want to be paired to avoid the device pairing to other devices.
2. If not pairing successfully, please turn off both devices and turn on again.
3. Do not take apart or modify the device privately. If any problems, please contact for customer service.
