

Instruction Manual

Thank you for purchasing this USB light! This is a portable LED lighting device with USB power supply, suitable for various scenarios such as office work, reading, and nighttime lighting.

Connect the USB LED's data cable to a power source, plug it into the USB port of a computer, power bank, or USB charger, and ensure the power supply is working properly.

Precautions: Do not expose this product to humid or high-temperature environments. Do not shine this product directly into your eyes. When cleaning, please wipe with a dry cloth. Do not rinse with water. Do not disassemble or modify this product.

When not in use for a long time, please disconnect the power supply. This product is not suitable for children's toys. If you find that the product is abnormally hot, smoking, or has an odor, please stop using it immediately
