[RAM and SSD Installation (This operation should be performed when the power is disconnected)]

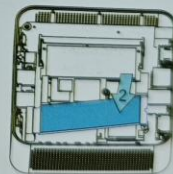

DDR SDRAM Installation (As shown in the figure)

1. Align the DDR SDRAM module with the RAM slot, then gently push the module into the slot at a 30° angle.
2. Press the module down until the DDR SDRAM is secured by the safety arms at both ends of the RAM slot.

SSD Installation (as illustrated in the picture)

1. Align the plug of the SSD and that of the M.2 slot on the motherboard, then gently push the SSD in.
2. Press the other end down and use screws to fix it in place

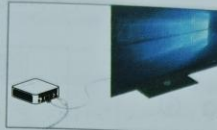

formed when the

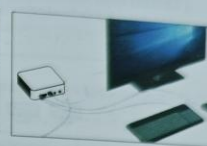

[Steps for Connection]

1. Connect the mini PC to the power supply supply

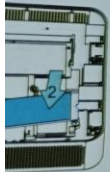

2. Connect the mini PC to the monitor with an HDMI cable

3. Connect the mini PC with a keyboard and a mouse

ly push the SSD in.

[Switching the Audio Playback Device in Windows]

If your PC is connected to multiple audio playback devices (eg. speakers, headphones, Bluetooth headset, monitors with built-in speakers, etc) simultaneously, you will need to choose one of them for audio playback.

1. Simply click the sound icon in your notification area (also known as the "system tray").

2. Click "Select playback device".

3. Choose a device from the list for audio playback.
