Manufacturer Name: Shenzhen Xiehang Technology Co., Ltd
Manufacturer Address: 205, Building 9, Houdequn Logistics Park, Shasong Road, Shajing Street, Bao'an District, Shenzhen, Guangdong Province, China
Manufacturer email: vqwqv2024@aliyun.com

1. Choose the Correct Size

The size must be chosen in reference to the size chart on page 1. The user must select a protector with the appropriate performance level for the intended use. The correct size must be chosen to ensure proper protection and safety. An ill-fitting protector may not provide adequate protection. Please refer to the size chart on the homepage for selection.

How to Measure:

- For Knee Pads: Measure the circumference of your upper leg, 8 cm (approx. 3 inches) above the center of the kneecap. Stand upright with leg muscles relaxed.
- For Elbow Pads: Measure the circumference of your upper arm at the fullest part. Keep your arm slightly bent.

Fitting Advice-Choose the size where your measurement falls within the range. If between sizes, select the larger one for comfort. The protector should fit snugly without restricting movement or blood flow.

2. Adjustment Instructions

The product is designed to stay firmly in contact with the skin/body. If present, straps and elastic bands should be fastened tightly to guarantee stability of the equipment during use. Before use, check that all closure systems are securely closed. The product should fit snugly but not too tightly. For maximum protection and safety, it should not cause any discomfort. If the protector can be removed from the garment, ensure to insert it back before using it, positioning it with the logo facing away from the body and with the bigger radius upwards (or the writing the right side up).

(1) Warning! Changes in environmental conditions such as temperature and wetness could significantly reduce the performance of the pad.

(2) Warning! Be aware that no protector can offer full protection against injury.

(3) Warning! Any contamination, alteration to the product or misuse could dangerously reduce the performance of the equipment.

(4) Warning! It is recommended to regularly inspect your gear. Any damage or deterioration may significantly reduce the protective performance of the protector. The protection it offers could be reduced due to mechanical wear or improper use. Before use, please check the product for any damage to the straps, stitching and pads. Dispose of the product if you notice any damage.

3. Main Materials: 83% nylon + 17% Spandex

4. Cleaning and care instructions

Remove any dirt with a damp cloth and mild soap. Do not bleach, iron or dry clean your product. Do not use hair dryers or other heaters to dry it. Do not use solvents or toxic substances to clean it.

	Professional Wet Cleaning Area	Do Not Iron	W. Hand wash only
	Machine Wash (40C, Gentle)		Do Not Bleach

5. Service Life, Inspection, and Disposal

Personal protective equipment has limited lifespan. For optimum safety, we recommend replacing your product three (3) years after the purchasing date. The product may lose its protective properties after heavy impacts or impacts that result in damages to the product. In such cases, the product must be replaced.

6. Intended Use & Non-intended Use

The intended and reasonably foreseeable use of this product is solely: biking, football, basketball; and can be used for any other activities. Not to be used for motorsports.

7. Protection Provided & Protection Not Provided

This product is designed and manufactured to provide limited mechanical protection to limb joints (elbow or knee) against bruises and minor abrasions. This product provides limited protection only in the areas covered by the equipment. This product does not safeguard against traumas caused by impact, twisting, torsion or extreme movements.

1. Selecting the appropriate size

The size should be selected based on the size chart on page 1. The user must choose such a protector, whose performance level meets the intended use. It is necessary to select the appropriate size for the correct one, to ensure protection and security. A poorly fitting protector cannot provide us with sufficient protection. For selection, please refer to the size chart on the home page.

Method of measurement:

- For knee pads: Measure the circumference of the upper part of the thigh, approximately 8 cm (approx. 3.15 inches) from the center of the knee bone. Above 3 inches. Stand upright, with your legs relaxed.

- For elbow guards: Measure the circumference of the upper arm at its thickest point. Keep the arm slightly bent.

Fitting advice - Choose the size in which your measurement falls within the range. If you are between two sizes, válassza a nagyobb méretet a kényelem kedvéért. The protector should fit snugly without restricting movement, or blood circulation.

2. Beállítási utasítások

The product is designed to stay snugly against the neck/body. If present, the collars and flexible silks are tight. They must be fixed to ensure the stability of the equipment during use. Before using, check that

Is every closing system securely closed? The product should fit snugly, but not too tightly. Maximális

For the sake of protection and security, it should not cause any inconvenience. If the shield can be removed from the clothing, Make sure that you reinsert the logo before use, removing it from the body, with the larger radius facing up (or the inscription placed on the right side at the top).

(1) Warning! Changes in environmental conditions, such as temperature and humidity, can significantly reduce the the performance of the protector

(2) Warning! Please note that no single protector can offer complete protection against injuries.

(3) Warning! Any contamination, modification, or improper use of the product may critically reduce the equipment performance.

(4) Warning! We recommend that you regularly check your equipment. Any significant damage or breakage can reduce the performance of the protective shield. The provided protection may decrease due to mechanical wear or improper use. Before use, please check the product for any damage to the hinges, seams, and protective pads. You will receive the product if detects any injury.

3. Fő anyagok: 83% nylon + 17% Elastán
