4. Safety & Warnings 【Mandatory by Category】

- * Wired keyboards should be powered via a standard USB interface. Do not disassemble or modify the internal circuitry to prevent short circuits, electrical leakage, or product damage.
-
- * Do not use in humid, high-temperature, dusty, or flammable/explosive environments. Keep away from water and fire sources to prevent liquids from seeping into the keyboard.
-
- * The product contains keycaps and other small parts; keep out of reach of children. Do not allow infants or young children to handle the keyboard unattended to prevent entanglement or injury from impacts.
-
- * Avoid prolonged, high-intensity typing or striking of the keyboard to prevent key breakage or structural damage. Maintain proper posture during use to reduce hand fatigue.
-
- * Always disconnect the keyboard before cleaning. Wipe with a dry, soft cloth. Do not directly pour water or spray liquid cleaning agents on the keyboard to prevent internal short circuits.
-
- * If the keyboard exhibits abnormal overheating, cracked casing, unusual odor, or malfunction, stop using it immediately and do not attempt to repair it yourself.

5. Instructions for Use 【Mandatory】

Wired Keyboard Usage Instructions

Connection Steps

1. Ensure your device (desktop or laptop) is powered on and has a available USB port.
2. Gently insert the wired keyboard's USB cable into the device's USB port (it doesn't matter which way you insert it).
3. The device will automatically recognize the keyboard; no manual driver installation is required (plug and play is supported on most mainstream systems, including Windows 10/11 and Mac OS).
4. Wait 1-2 seconds. If the keyboard indicator light illuminates normally (or any key responds), the connection is successful and the keyboard is ready to use.

Wireless Keyboard Usage Instructions

Battery Installation (Battery-Powered Model)

1. Flip the keyboard over to locate the battery compartment cover at the bottom. Push the cover open in the direction indicated by the arrow.
2. Install the correct type of battery according to the positive and negative markings (+/-) inside the battery compartment (usually two AA batteries; refer to the product label for specific specifications).
3. After installation, close the battery compartment cover, ensuring it is securely closed to prevent poor battery contact.

Connection Method (Two Versions Available)

2.4G Receiver Version

1. Remove the 2.4G receiver from the storage slot at the bottom of the keyboard (if applicable);
2. Gently insert the receiver into an available USB port on your device (desktop or laptop);
3. Turn on the power switch at the bottom of the keyboard (if applicable). The keyboard will automatically pair with the receiver;
4. Wait 1-3 seconds. If the keyboard indicator light illuminates normally, or if pressing any key produces a response, pairing is successful and the keyboard is ready for use.

Bluetooth Version

1. Turn on the power switch at the bottom of the keyboard (if present), press and hold the pairing key (usually marked with "Bluetooth" or "Pairing" icon) for 3 seconds. The pairing indicator light will start flashing rapidly (indicating that pairing mode has been entered);
2. Turn on the Bluetooth function of your device (computer, tablet) and search for nearby Bluetooth devices;
3. In the device search results, find the device name corresponding to this keyboard (e.g., "XXX Wireless Keyboard"), and click to connect;
4. Wait 1-2 seconds. If the pairing indicator light stops flashing (stable or off), and the device displays "Connected," pairing is successful and it can be used normally.

Sellers should adjust the content based on actual product features and local laws to ensure that the final user manual is **accurate, complete, and legally compliant**. AliExpress assumes no responsibility for any compliance or legal issues arising from the use of this template.

Note: The Bluetooth keyboard can be paired with multiple devices simultaneously (some models support this). You can switch between different devices by toggling the pairing key. If pairing fails, turn off the Bluetooth on the device and the keyboard, and repeat the pairing steps.

NOTE: Sellers shall add and adjust product-specific steps where necessary.
