Features:
1. Type-C port + rechargeable battery design for long-lasting durability and greater environmental friendliness
2. One-button testing for simple and convenient operation, improving repair and testing efficiency
3. Audible beep + flashing blue light for instant results—no need to stare at the light
4. Insulated housing design provides protection against water, moisture, and oxidation for safer use
5. Dual low-battery alerts with visual indicators to prevent power loss during critical moments
Product Specifications:
Product Name: Rechargeable Inductance Tester
Power Supply: USB charging + rechargeable battery
Interface: Type-C port
Battery Model: ML2032*1
Battery Voltage: 3V
Battery Capacity: 65mAh
Function: Detects whether inductors on electronic circuit boards are abnormal
Charging Indicator:
Charging: Red light
Fully charged: Green light
Usage:
1. One-button power on; press and hold for three seconds to power off, or the device will automatically power off after three minutes of inactivity 2. Normal inductor indication: Blue light flashing + buzzer sounds
3. Abnormal inductor indication: No light + no sound
Package Contents:
Tester x1
