In case of contact with them, rinse immediately with water. If there is any incident, contact the doctor immediately. Stop using the product if redness and itching develop. Keep out of the reach of children.

1. Prep
Trim, file, buff and clean nails for a clean, dry and oil-free surface

2. Base Coat
apply a thin layer of base coat and cure under uv/led nail lamp for 45-60 secs

3. Nail Polish
apply color gel and cure for 45-60s. color gel needs to be applied 2-3 times and cured

4. Top Coat
apply top coat and cure for 60s

Tips

1. The preparation steps are very important for a long-lasting manicure. make sure the nail surface is completely filled and clean before applying the gel.

2. Additional use of nail preparation dehydrator for stronger adhesion

Tips

1. Apply evenly and apply thin nails

2. The base coat will be sticky after curing, please do not wipe it

Tips

1. When coloring, use a brush to wipe off the excess before coloring.

2. It is normal for the gel to have a sticky feeling after curing, and it needs to be sealed with a top coat

3. Do not apply too thick coats of gel polish, or it will hard to dry and peel off easily

Tips

1. Use a brush to seal the edges of the nails horizontally to avoid shearing and peeling
