

500ml Outdoor Portable Pet Dog Water Bottle Instruction Manual

1. Product Overview

Product Name: 500ml Outdoor Portable Pet Dog Water Bottle, Extrusion Dog Travel Water Cup, Pet Drinking Water Feeder Bowl for Dog and Cat

Description: A practical and portable pet water bottle, specially designed for outdoor use to provide convenient drinking water for dogs and cats. With a 500ml large capacity, it can hold enough water to meet your pet's drinking needs during travel, walking, hiking and other outdoor activities. Made of high-quality PP material, it is non-toxic, harmless, durable and safe for pets to use. The bottle features an extrusion design for easy water dispensing, a built-in water bowl for pets to drink from, and a portable design that is easy to carry. It is universal for all dog breeds and also suitable for cats, available in three colors (blue, pink, grey). Lightweight (only 130g) and compact (size: 21.5*10.7*10.7cm), it is an essential accessory for pet owners to take their pets out.

Specification:

- Item Type: Water Bottles (Pet Drinking Water Bottle)
- Volume: 500ml (Large capacity, meets outdoor drinking needs of pets)
- Applicable Pet: Universal for all dog breeds; also suitable for cats
- Type: Designed for Dogs, compatible with Cats
- Size: 21.5*10.7*10.7cm (Compact size, easy to carry)
- Product Material: PP (Polypropylene, non-toxic, harmless, durable, food-grade safe for pets)
- Color: Blue, Pink, Grey (Three color options available)
- Weight: 130G (Lightweight, no burden for outdoor carrying)
- Key Features: Built-in water bowl, extrusion design, portable, 500ml large capacity, PP material, universal for pets

Package Includes: 1 x 500ml Portable Pet Water Bottle (Integrated with water bowl, no other accessories included)

2. Product Features

- **Large Capacity & Portable:** 500ml capacity can hold enough water for pets during outdoor activities (walking, traveling, hiking), reducing the need for frequent refilling. Lightweight (130g) and compact size (21.5*10.7*10.7cm), easy to carry in hand, backpack or pet bag, no burden.
- **Safe PP Material:** Made of high-quality food-grade PP material, non-toxic, odorless, harmless to pets, durable and wear-resistant, can withstand long-term use and outdoor wear and tear.
- **Extrusion Design:** Adopts an easy-to-use extrusion design—simply squeeze the bottle body to dispense water into the built-in bowl, and release the squeeze to stop water flow, avoiding water waste and keeping the bottle clean.
- **Built-in Water Bowl:** Integrated with a water bowl, no need to carry an extra bowl. The bowl is designed to fit pets' mouths, making it easy for dogs and cats to drink water comfortably.
- **Universal Compatibility:** Suitable for all dog breeds (small, medium, large dogs) and also compatible with cats, meeting the drinking needs of different pets.
- **Multiple Color Options:** Available in blue, pink and grey, you can choose the color according to your preference or your pet's style.
- **Leak-Proof Design:** The bottle is tightly sealed to prevent water leakage, ensuring that your bag, hands and clothes stay dry when carrying it outdoors.

3. Safety Warnings / Safety Information

- This product is a **portable pet water bottle** designed for dogs and cats to drink water only. Do not use it for non-pet purposes (such as storing human drinks, toxic liquids, or as a toy), which may cause safety hazards.
- Keep this product away from children under 3 years old. The small parts (if any) and the bottle body may cause choking hazards if accidentally swallowed by young children; do not let children play with the water bottle or squeeze it randomly, to avoid water splashing or injury.
- Children (3-12 years old) must be supervised by adults when using the product to feed pets. Do not let children fill the bottle with hot water or use it to feed aggressive pets, to avoid burns or being bitten.

- Do not fill the bottle with hot water (temperature above 40°C). Hot water may deform the PP bottle body, scald your pet's mouth and tongue, or cause water to splash and burn people.
- Do not use corrosive substances (such as bleach, strong acid, strong alkali) to clean the water bottle. These substances will damage the PP material, release harmful substances, and may contaminate the water, endangering your pet's health.
- Before using the bottle for the first time, clean it thoroughly with warm water and a soft cloth. Do not use sharp tools (such as steel wool, scissors) to scrub the bottle or the built-in bowl, to avoid scratching the surface and breeding bacteria.
- Do not drop, hit or step on the water bottle violently. The PP material may crack or break when hit, causing water leakage or sharp edges that can scratch pets or people.
- Check the bottle regularly for damage (cracks, leaks, loose seals). If the bottle is damaged, stop using it immediately to avoid water leakage, bacterial growth or injury to pets.
- Do not let pets bite or chew the water bottle or the built-in bowl for a long time. Biting may damage the bottle, cause it to leak, or the pet may ingest small plastic fragments, leading to digestive discomfort.
- When carrying the bottle, ensure that the lid is tightly closed to prevent water leakage. Do not place the bottle near electronic devices, paper or other items that are afraid of water.
- Do not store the bottle with water for a long time (more than 24 hours). Stagnant water may breed bacteria, mold or algae, which is harmful to your pet's health. Discard any unused water and refill it with fresh water before each use.
- Store the unused bottle in a cool, dry and clean place, away from high-temperature environments (such as near stoves, heaters) and direct sunlight. High temperature may cause the PP material to deform or aging.
- If the bottle is contaminated with toxic substances or harmful liquids, discard it immediately and do not use it again, to avoid endangering your pet's health.

4. Usage Instructions

- ① Before First Use: Clean the entire water bottle (including the built-in bowl and lid) with warm water and a soft cloth, then rinse it thoroughly with clean water. Dry it completely before filling with water to ensure hygiene.
- ② Filling Water: Unscrew the bottle lid, fill it with clean drinking water (room temperature is recommended, do not use hot water). Do not fill the water to the full (leave a small gap) to avoid water overflow when squeezing. Screw the lid tightly after filling.
- ③ Dispensing Water: When your pet needs to drink water, hold the bottle steadily, flip down the built-in water bowl to open it. Gently squeeze the bottle body to dispense an appropriate

amount of water into the bowl. Stop squeezing when the water reaches a suitable level (do not overfill to avoid waste).

④ **Pet Drinking:** Place the water bowl near your pet's mouth, let the pet drink water freely. If there is leftover water in the bowl after drinking, gently squeeze the bottle again to suck the leftover water back into the bottle (to avoid waste and bacterial growth), then flip up the bowl to close it.

⑤ **Carrying:** After use, ensure the lid is tightly closed and the bowl is flipped up and fixed. Carry the bottle in your hand, backpack or pet bag, avoiding violent shaking to prevent water leakage.

⑥ **Refilling:** When the water in the bottle is used up, unscrew the lid and refill it with fresh clean water. It is recommended to replace the water with fresh water every few hours during long outdoor activities.

5. Cleaning and Maintenance Instructions

5.1 Cleaning Instructions

① **Regular Cleaning:** Clean the water bottle thoroughly after each use to avoid the accumulation of residual water, food residues or bacteria. Disassemble the bottle (if applicable) or flip down the bowl, rinse the inner and outer surfaces with warm water.

② **Deep Cleaning:** Clean the bottle with a soft brush (such as a toothbrush) once a day to clean the inner wall of the bottle and the gaps of the bowl, removing any dirt or algae. You can use a small amount of edible salt or pet-safe cleaning agent (do not use corrosive detergents) for deep cleaning, then rinse thoroughly with clean water.

③ **Drying:** After cleaning, dry the bottle and bowl completely with a clean soft cloth, or place them in a cool, well-ventilated place to air-dry naturally. Do not dry them in direct sunlight for a long time, to avoid the PP material aging.

5.2 Maintenance Instructions

① **Regular Inspection:** Check the bottle, lid and bowl regularly (every 1-2 days) for damage, cracks, leaks or loose seals. If any damage is found, stop using the bottle immediately and replace it with a new one.

② **Seal Maintenance:** Check the seal of the lid regularly. If the seal is loose, deformed or damaged, replace the seal (if available) or the whole bottle to prevent water leakage.

③ **Avoid Scratches:** Do not use sharp tools to scrub the bottle or bowl, to avoid scratching the surface. Scratches may breed bacteria and affect the service life of the bottle.

④ **Storage:** When not in use for a long time, clean the bottle thoroughly, dry it completely, and store it in a cool, dry and clean place. Avoid stacking heavy objects on the bottle, and keep it

away from high temperature and direct sunlight.

6. Notes

- Capacity Note: The bottle volume is 500ml; do not overfill to avoid water overflow when squeezing or carrying.
- Size Note: The bottle size is 21.5*10.7*10.7cm, weight is 130g. Due to manual measurement, there may be a slight deviation of 0.1-0.3cm in size and 1-5g in weight, which is normal and does not affect use.
- Material Note: The product is made of PP material; slight color differences or texture differences due to production batch are normal, which do not affect the quality and safety of the product.
- Color Note: The bottle is available in blue, pink and grey. The actual color received may slightly differ from the picture due to shooting light and display, which is not a quality issue.
- Package Note: The package includes 1 x 500ml Portable Pet Water Bottle; no other accessories are included.
- Water Note: It is recommended to use clean drinking water for pets; do not use dirty water, mineral water with high mineral content or hot water, to protect the pet's health and the bottle's service life.
- Compatibility Note: The bottle is universal for all dog breeds and suitable for cats; for large dogs, you can dispense more water at one time to meet their drinking needs.
- Leakage Note: If the bottle leaks, check whether the lid is tightly closed or the seal is damaged. Tighten the lid or replace the seal/bottle if necessary.
