## 4. Maintenance and Precautions

**Spring Warning:** The spring has strong elasticity; do not point the comb at your eyes or delicate facial areas when it pops out. Avoid touching the area to prevent injury.

**Caution:** The spring action is snappy. Do not point the comb at eyes or face when deploying to avoid injury.

**Keep Clean:** Regularly wash the comb teeth with warm soapy water, and after drying, you can apply a small amount of lubricant to the shaft to maintain smooth opening and closing.

**Maintenance:** Clean the comb teeth regularly with warm soapy water. After drying, a tiny drop of oil on the pivot point will keep the action smooth.

**Gentle Use:** Although it is made of metal, please do not apply force in reverse to pry heavy objects, to avoid damage to the shaft limit switch.

**Usage:** Do not use excessive force or use it as a pry tool, as this may damage the pivot mechanism.
