

## User's Manual

Product Name: Mini Waterproof Motorcycle Clock (with Adhesive Mount)

### 1. Product Introduction

Thank you for purchasing this mini motorcycle clock. It displays hours and minutes, and features a waterproof, shockproof design suitable for motorcycles, bicycles, offices, lockers, or home use. Installation is quick via double-sided adhesive tape, and the clear display ensures easy time reading in various environments.

---

### 2. Product Features

**Multi-Scene Use:** Ideal for motorcycles, electric vehicles, workbenches, home walls, glass, or lockers.

**Waterproof & Shockproof:** Durable casing with side rubber seal (do not tear the rubber to maintain waterproofing).

**Easy Installation:** Pre-attached high-quality double-sided tape allows installation in seconds.

**Clear Display:** Waterproof display (not for long-term immersion) with clear time/date readout.

**Multi-Function:** Supports time/date display, stopwatch mode, and time calibration.

---

### 3. Package Contents

Mini Clock × 1

Double-sided adhesive stickers × 2

---

### 4. Product Specifications

Diameter: 27.5mm

Thickness: 10mm

Display: Time/Date/Stopwatch

Buttons: 3 buttons (A, B, C) on the right side

Waterproof Rating: Life waterproof (avoid long-term immersion)

---

### 5. Usage Instructions

#### Installation

Clean the target surface (smooth wall, glass, motorcycle dashboard, etc.) to ensure it is dry and free of dust.

Peel the backing from one of the double-sided stickers.

Attach the sticker to the back of the clock, then press firmly onto the target surface for 30 seconds to ensure adhesion.

Do not move or expose the clock to water for 24 hours to allow the adhesive to fully cure.

#### Basic Operations

##### A Button (Main Functions):

Single press: Switch to date display (automatically returns to time after 2 seconds).

Double press: Enter stopwatch mode (runs for 60 seconds; press B/C to clear, press A again to return to time).

##### B/C Button (Time/Date Calibration):

First press: Switch between time and date display.

Second press: Enter month adjustment → use A button to change the month.

Third press: Enter date adjustment → use A button to change the date.

Fourth press: Enter hour adjustment → use A button to change the hour.

Fifth press: Enter minute adjustment → use A button to change the minute.

Sixth press: Return to time display (time is paused). Press A again to start the clock and complete calibration.

---

## 6. Care & Maintenance

Keep the side rubber seal intact to maintain waterproof performance.

Clean the display with a dry cloth; do not use chemical cleaners.

Store in a cool, dry place away from extreme temperatures and direct sunlight.

Avoid carrying the clock on your person (static electricity from human activity may reset the clock to zero).

---

## 7. Notes

**Waterproof Notice:** The clock is life waterproof but cannot be immersed in water for long periods.

**Static Electricity Risk:** Do not carry the clock with you to avoid static electricity causing time reset.

Manual measurement may result in slight size errors, which do not affect normal use.

For any quality issues, please contact customer service for after-sales support.

---

## 8. ⚠ WARNING

**Adhesive Safety:** Ensure the mounting surface is clean and dry before applying the sticker to prevent the clock from falling off.

**Static Hazard:** Do not carry the clock in your pocket or on your body to avoid static electricity resetting the time.

**Water Damage Risk:** Do not tear the side rubber seal, as this will break the waterproof function.

**Keep Away from Children:** Store small parts (stickers) out of reach of children to prevent choking hazards.

**Do Not Modify:** Do not disassemble or modify the clock, as this will void the warranty and may damage the internal components.

---

## 9. Disposal

Discard according to local electronic waste and plastic recycling regulations. Do not mix with household waste.
